

Universal control- and safety isolating- resp. isolating transformer **STU 63/2x115**

Picture shows STU 160/24

Advantages

Universal input voltages 210 to 540 Vac
Very good switch-on behaviour thanks to reduced starting currents
High power density due to a compact construction design
Very good corrosion protection and low noise thanks to BLOCK IMPEX vacuum impregnation
Contact protected screw connection terminals complying with UVV BGV A3
Simple mounting thanks to robust metal footplate with oval slots

Applications

As a control transformer for the electrical isolation of the input and output sides. The construction of the transformer is designed to supply control systems according to EN 60204.

As an isolating transformer for the safe electrical isolation of the input and output sides. The transformer may be used to set up protective separation as a protective measure in accordance with VDE 0100.

As a safety isolating transformer for the safe electrical isolation of the input and output sides. The transformer is suitable for creating SELV and PELV circuits because of the limit on the output voltage.
